

WARP PREPARATION

LINKMATIC®

LINKMATIC® automatic batch changing system

Your benefit

Minimal waste – continuous processing reduces yarn waste to the minimum.

Maximal productivity – with only two minutes batch change, productivity increases to the maximum.

Operator efficiency – the complete drawing-in and leasing preparation requires only one person and allows perfect tension control across the warp sheet.

Beam creel

8–24 beams

Beam diameter

1000 / 1250 mm

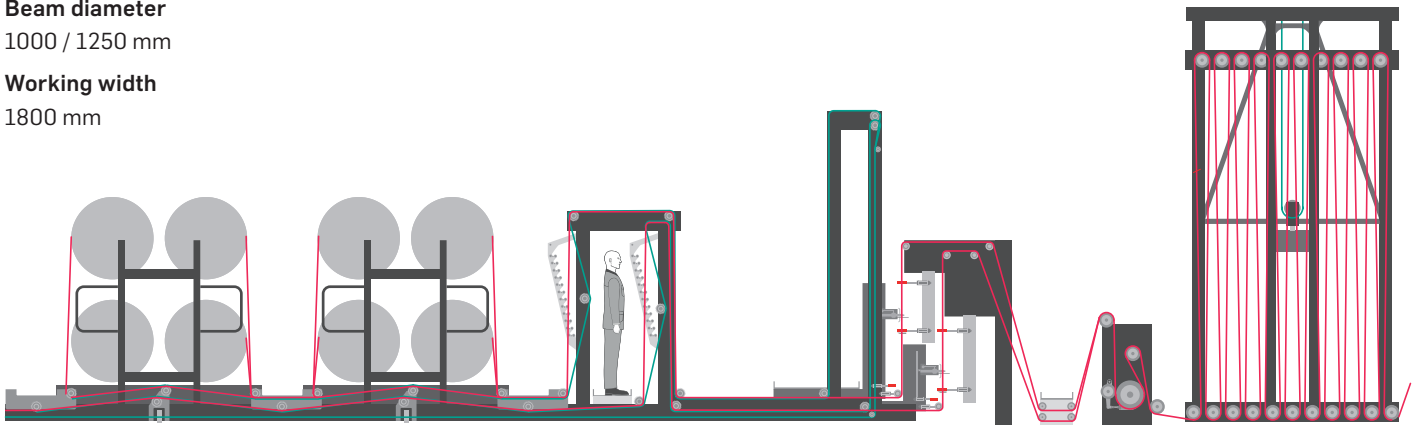

Working width

1800 mm

Leasing device

Automatic knotting batch change

Yarn storage 100 m

Creel preparation

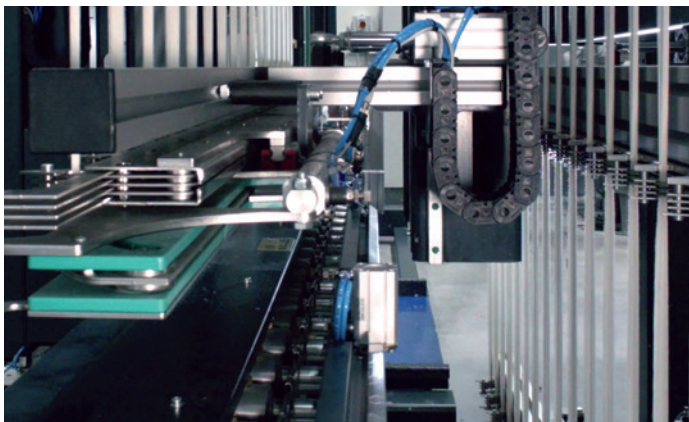

Yarn feeding system

Knot preparation

Automatic batch change
